

# How To Activate The Mediasite Module In Canvas

Within a course in Canvas, click on the **Settings** link on the lefthand side of the page.

Then click on the Apps tab.

Within the lineup of apps, you should see 2 Mediasite apps.

Make sure that you click on the **Mediasite 7** app, not the **Mediasite 7 Courses** app.

Apps are an easy way to add new features to Canvas. They can be added to individual courses, or to all courses in an account. Once configured, you can link to them through course modules and create assignments for assessment tools.

### Mediasite 7

Mediasite brings easy-to-use lecture capture and video publishing to Canvas. From any course, faculty use My Mediasite to capture or upload video lectures, screencasts and tutorials. Sharing content has never been easier – automatically publish to designated courses or embed video content anywhere in the LMS. With single sign-on, students quickly access content and stream course videos without leaving Canvas. Mediasite provides the most engaging learning experience with powerful video search, interactivity and sharing tools.

Mediasite 7 introduces the ability to search and embed Mediasite content along with the abstract in Canvas. Prior to Mediasite 7 only links to Mediasite content could be embedded in Canvas.

Click the Add App button.

In the field labelled Launch URL: Type your catalog or presentation link and click **Submit**.

## HOW TO ADD MEDIASITE VIDEOS/CATALOGS AS MODULES

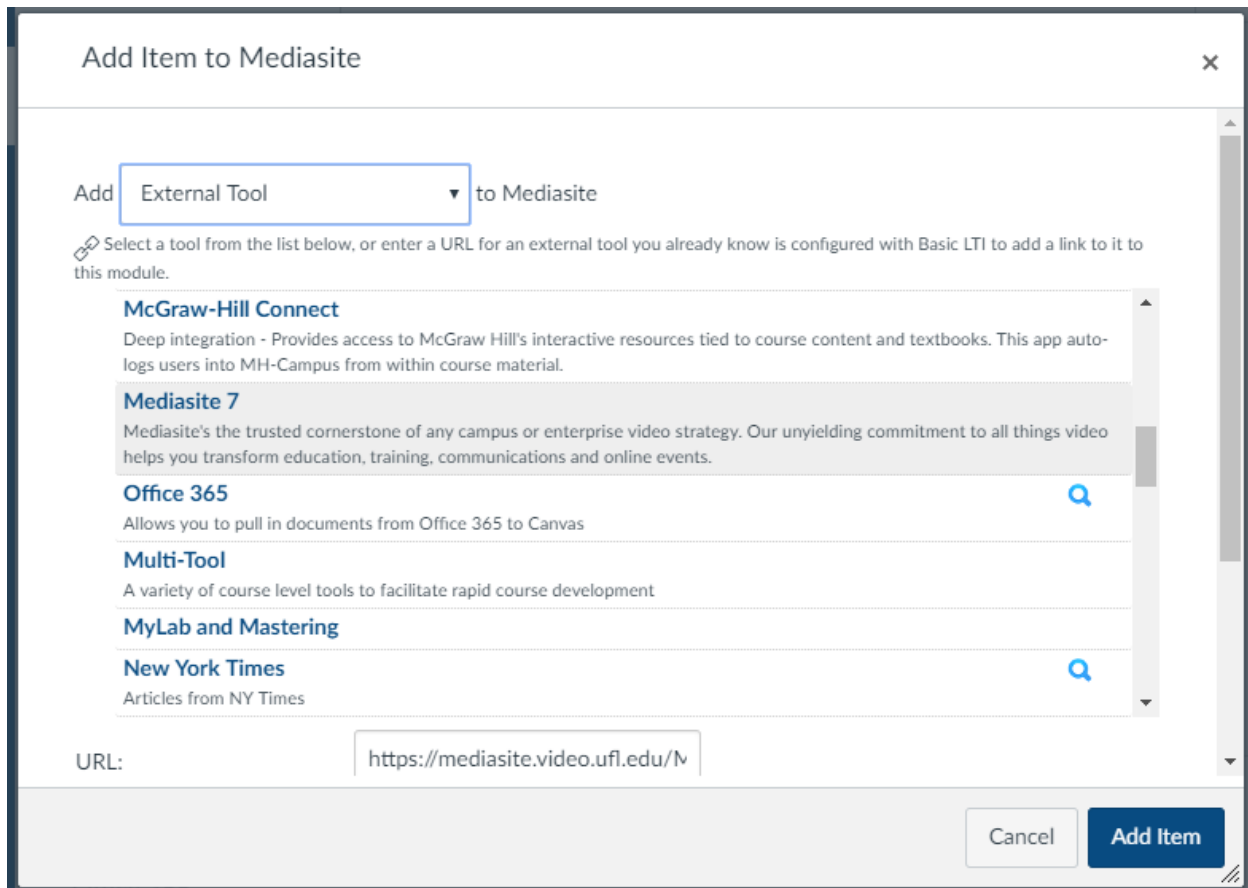

Click on Modules on the left hand side of the screen.

Then click on the + Module button and call your Module whatever you'd like.

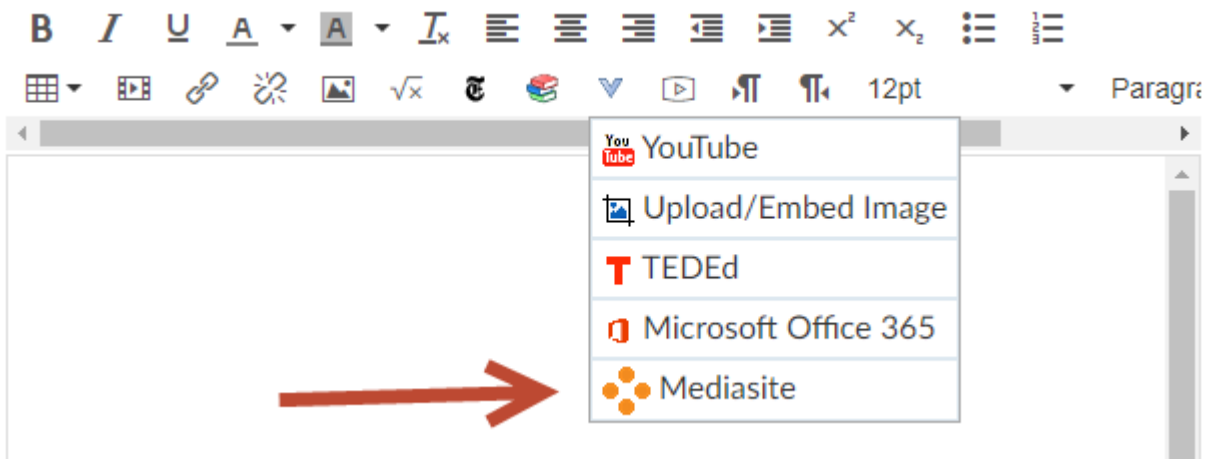

Click the + Button in the Module you created.

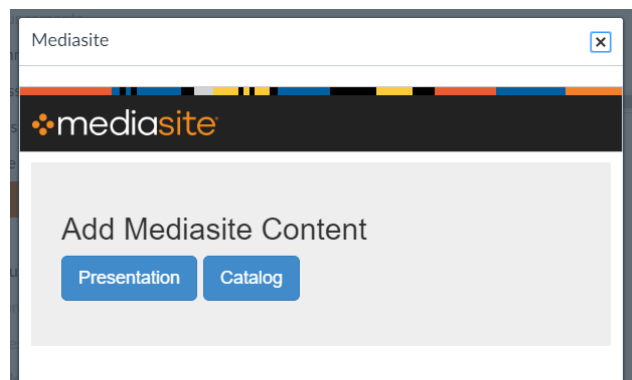

Select **External Tool** in the dropdown. Find the **Mediasite 7** tool and select it. As you see, it will populate the URL of the presentation or catalog that you entered. You can change the link to any other Mediasite Catalog or Presentation link if you want to. When you click on Add Item, it will add your Catalog or Presentation as a Module and load it inside of the Canvas window.

## HOW TO EMBED MEDIASITE VIDEOS/CATALOGS IN CANVAS

As of October 2015, Canvas is able to embed Mediasite videos into pages and lessons. Anywhere that you have access to a WYSIWYG Text Editor, you should be able to embed Mediasite videos and catalogs. For the purposes of this tutorial, we will be editing a “Page” in Canvas.

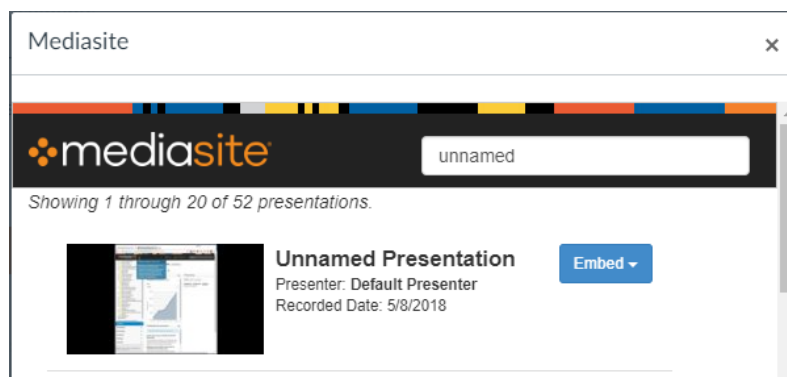

Within the text editor, you should see a blue downward-facing triangle button. Click on it and the Mediasite option will appear.

You will be given the choice to embed a Presentation or Catalog.

Either option will bring you to a Search bar. Simply type in the name of the presentation or catalog in the search bar.

You will be shown “Embed” button. Click this and you will be given different options for embedding.

If you are embedding a catalog, you will be given the options: **Link** and **Embed**. Link places a hyperlink to the catalog in your Page. Embed actually places the full catalog inside of the page in Canvas.

If you are embedding a Presentation, you will be given **Abstract Only** or **Abstract + Player** as options. Abstract Only places a thumbnail and metadata into the page, which all link to the video. Abstract + Player embeds the video along with metadata information. If you just want to embed the video into your page, you will want the Abstract + Player option, because you can delete the metadata and leave just the embedded video.

**If you have any questions, please contact Video & Collaboration Services at [video@ufl.edu](mailto:video@ufl.edu) or 392-4357.**
